## WORK EXPERIENCE

### Creative Brackets

2018 - Present

In 2018, I was given the opportunity to work in the firm Creative Brackets. I gladly accepted this invitation because I saw a great challenge and a great opportunity to significantly improve my professional skills by working on larger and more complex projects.

### Web Factory

2016 - 2018

At Web Factory I was part of a small team mostly designing websites and online shops. During the period I spent in the company I had the opportunity to create and maintain a large number of sites, which helped me develop my professional skills. Part of my job was also the communication with clients, thanks to which I learned to manage people and further developed communication skills.

### C1 Studio

2016

At C1 Studio I worked on creating and updating the website, creating and maintaining the app used for internal purposes. C1 Studio is an architectural studio where I had an opportunity to learn how to manage more responsibilities. This experience was important for my professional development, and I had a successful collaboration with colleagues, but due to the need to be more in touch with people in the IT industry, I left the company.

### Alster Cloud (Trainee)

2014 - 2016

As soon as I began my studies, I successfully found my first internship at AlsterCloud. My job was to code the pages (HTML, CSS) I had received in PSD format from the colleagues.

## EDUCATION

### ICT College of applied Studies, Belgrade

2014 - 2017

After graduating high school, I enrolled in the College of Information Technology, the Department of Internet Technologies. During studies I had an opportunity to develop my web programming skills, mostly using PHP programming language. In college I had an opportunity for the first time to familiarize myself with and work in relation to MVC architecture, object-oriented programming, and frameworks like CodeIgniter.

### Electrical Engineering High School "Nikola Tesla"

2010 - 2014

I graduated from the high school of electrical engineering "Nikola Tesla", Computer Engineering school programme, where Programming was one of the most important subjects. For the Matura exam I choose precisely Programming.
